

RITWAY CONSULTING SERVICES, LLC

CAPABILITY STATEMENT

Riteway Consulting Services, LLC makes contributions in public works, and state and federal project construction management. Our team members have decades of construction experience in various trades and management levels.

Projects completed include digester rehabilitation, construction of a new regional wastewater reclamation facility and water quality lab, agency wide air release and vacuum (ARV) relief valves relocation and replacement, waste gas flare system improvements, earthwork and infiltration restoration, digester rehabilitation, and emergency work such as broken pipes, building structure repair, and street work.

Other types of projects completed include state and federal military projects, airports, building and remodeling police and fire stations, commercial and industrial projects, as well as local government, retail stores, and schools.

Riteway Consulting Services, LLC is available 24 hours a day, 7 days a week, 365 days a year for Emergency Projects.

Consulting • Construction Management • Professional Services

Core Capabilities

Riteway Consulting Services, LLC only provides seasoned professionals with proven track records, who are safety conscious, and who provide the utmost respect, confidentiality and integrity for every company in which services are provided, for each project worked on, and during every professional interaction.

Project Management

Project management services are designed to manage a construction project from start to finish. This includes full time project management oversight to a successful completion, Business Strategy & Planning Support, Change Management & Facilitation Support, and Financial and Statistical analysis.

Construction Inspection

Inspection is an important step in the construction process to reduce detrimental errors and misunderstandings and to provide confidence that work is being completed as intended. Inspection includes documenting the daily process, ensuring that processes are completed as intended per plans and specifications, providing updates to project management, safety evaluations, construction quality management, engineering cost estimates, contractor cost evaluations, assistance with project design and development, and constructability reviews. Riteway provides General Building Inspection with our specialized knowledge in civil, mechanical, and electrical construction, as well as specialized inspection services in a variety of trades.

Administration

Riteway provides well-organized, reliable, expert, detailed and professional handling of all project documentation and communication, tracking and reporting metrics, data input, scheduling, and meeting arrangements, and the professional administrative assistance needed to handle tracking, reporting, and communication arrangements.
